EXPERIMENT DECOMMISSIONING AND DISMANTLEMENT SAFETY REVIEW FORM

PRINCIPAL INVESTIGATOR:		DATE:
GROUP:		
EXT:	E-MAIL:	
Project Title:		
Location(s):		
Proposed Start Date and Duration	n:	
Area Walkthrough Date:		
SIGNATURES:		
Approval ES&H		Division
Department DSO or Designee:		Date:
Review/Approval Comments:		
Has a NEPA review been perforn	ned for this project? □ Y □ N	

FESHM 7050 Form F2 December 2020

I. DEFINE THE SCOPE OF WORK

A. Description

Briefly describe the expired experiment. Identify all apparatus that were used, and any associated specifications (i.e., drawings, lifting fixtures). List any special equipment (X-ray generators, lasers etc.) that was used during the project.

Indicate if modification of facility is required. Include a list of the decommissioning phases of the experiment. The Work Permit Process/Form may better address the hazards & controls of the setup and/or tear down phases.

FESHM 7050 Form F2 December 2020

B. Waste Disposal/Waste Control

Describe how you plan to minimize generation of the wastes, and identify pollution prevention opportunities. Describe how to plan, conduct, and closeout work activities to eliminate or minimize the impact of their activities on the environment.

FESHM 7050 Form F2 December 2020

II. IDENTIFY AND ANALYZE HAZARDS ASSOCIATED WITH THE WORK

In this section indicate the hazards in each class. Focus on all aspects of the decommissioning process.

Physical Hazards (chec	ck all that apply)	□ None		
☐ Cryogens	☐ Oxygen deficient atmosph	nere	☐ Noise	> 85 dBA
☐ Fall hazards (e.g., ladders, elevated platforms, towers)				
☐ Material handling equipment (e.g., cranes, hoists, forklifts)				
☐ Machine shop or non	-portable powered tools use			
	kposed conductors, large batter HM Form 5042may need to be comp			
☐ Electrical hazards (D	ismantling of existing electric	al delivery con	nponents,	i.e., conduit)
☐ Confined space		☐ Trenching	/soil exca	vation
☐ Extreme temperature Fahrenheit)	s in workplace (> 80 ⁰	☐ Remote lo	cation/Un	derground Enclosure
☐ Thermal Sources of I	Heat			
☐ Compressed gases (le	ecture bottles, cylinders, gas li	nes)		
☐ Pressurized vessels o	r systems			
☐ Vacuum chambers or	systems			
☐ Interlock Systems				
☐ Open flames	Walding cutting brazing silver soldering			
☐ Flammable gases/liquids/solids		☐ Other spar	rk produci	ng activity
☐ Material Rigging (e.g., shielding materials, magnets, calorimeters, etc.)				
☐ Magnetic fields				
☐ Limited facility lighting (Is lighting sufficient to perform all required work activities?)				
☐ Ergonomic Conditions (contact, stress, vibration, repetitive motion, manual lifting?)				
☐ Low Clearance or multi-level simultaneous work				
☐ Other (specify):				
Chemical Hazards (check all that apply) ☐ None				
☐ Carcinogens	☐ Highly acute toxins	☐ Reproduct toxins	tive	☐ Corrosives
☐ Flammable liquids	☐ Flammable solids	☐ Strong ox	idizers	□ Oils

FESHM 7050 Form F2 December 2020

☐ Explosives	☐ Peroxiders		☐ Pyrophoric materials	□ PCBs	
☐ Asbestos	☐ Pesticides/herbicides		☐ Controlled substances		
☐ Highly reactive mate	rials		☐ Perchlorates	☐ Perchlorates	
☐ Lead (used in Experi	ment Design)				
☐ Beryllium or Berylliu	ım hybrid articles used ir	n Exp	eriment		
☐ Cadmium		$\Box z$	inc		
☐ Other Toxic metals (e	e.g., As, Ba, Cr, Hg, Se,	Ag)			
☐ Other (specify):					
Radiation Hazards (ch	eck all that apply)		□ None		
☐ Sealed radioactive so	ources		☐ Windowless radioac	tive sources	
☐ Dispersible radioactiv	ve materials		☐ Neutron-emitting rad	dioactive sources	
☐ Non-fissionable radio	pactive materials		☐ Fissionable radionuc	elides	
☐ Ionizing radiation-ge	nerating devices (x-ray s	ource	s, accelerators)		
☐ Class IIIa, or IIIb (vis	sible >5mW) lasers		☐ Class IIIb (nonvisibl	le >5mW) or IV lasers	
☐ Dynamic magnetic fi	elds >1G at 60 Hz or dyı	namic	electric fields $> 1 kV/m$	at 60 Hz	
☐ Static magnetic fields	s < 5 G. No Exposure Fo	orm is	required		
☐ Static magnetic fields	s > 5 G and < 600 G		☐ Static magnetic field Static Magnetic Fie	<u> </u>	
☐ Static magnetic fields ≥ 600 G		when required.			
☐ Radio frequency (RF) or Microwave sources exceed			ding 10 mW radiated ou	tput	
☐ Other (specify):					
Biological Hazards (check all that apply)		□ None			
☐ Regulated etiological agent		☐ Animals			
☐ Visible Fungal Growth					
☐ Other (specify):					
Security Issues Checklist (check all that apply)		□ None			
☐ Access controls		☐ Cyber security			
☐ Classified materials or information		☐ Valuable materials			

FESHM 7050 Form F2 December 2020

☐ Import or export controls	☐ Personnel security		
☐ Nuclear material control and accountability	☐ Other (specify):		
Significant Environmental Aspects (check all that a	pply) None		
☐ Any amount of hazardous waste generation			
☐ Any amount of radioactive waste generation			
☐ Any amount of mixed waste generation (radioactiv	e hazardous waste)		
☐ Any amount of transuranic waste generation			
☐ Any amount of industrial waste generation (e.g., oi	ls, vacuum pump oil)		
☐ Any amount of Regulated Medical Waste			
☐ Any atmospheric discharges that require engineering pollutants or radioactive emissions, or are identified monitoring under NESHAP	<u> </u>		
☐ Any liquid discharges that require engineering controls to limit the quantity or concentration of the pollutant, or include radionuclides detectable at the point of discharge from the facility			
☐ Storage or use of any chemicals or radioactive materials that require engineering			
☐ On-site or off-site transportation of chemicals or dispersible radioactive materials			
☐ Any use of once-through cooling water discharged to the sanitary sewer			
☐ Soil contamination or activation			
☐ Any underground pipes/ductwork that contains chemical or radioactive material/contamination			
☐ Other environmental aspects related to your work (specify):		

FESHM 7050 Form F2 December 2020

III.DEVELOP AND IMPLEMENT HAZARD CONTROLS

For each hazard identified in the previous section, describe how each significant hazard is to be controlled. Identify the Engineering Controls (e.g., interlocks, shielding), Administrative Controls (e.g., procedures, Radiological Work Permits) or Personal Protective Equipment (e.g., respirators, gloves) that will be employed to reduce hazards to acceptable levels.

Note: Include maintenance, inspection and testing, and formal calibration, including frequency as appropriate. B. Chemical Hazards/Controls Hazard Controls (Administrative, Engineered, Protective Equipment) Note: Refer to the Fermilab MSDS Database for requirements, especially for informating particularly hazardous chemicals such as carcinogens, reproductive toxins, highly acute toxins, including postings, decontamination plan, and address above. C. Environmental Hazards/Controls	Hazard	Controls (Administrative, Engineered, Protective Equipment)
B. Chemical Hazards/Controls Hazard Controls (Administrative, Engineered, Protective Equipment) Note: Refer to the Fermilab MSDS Database for requirements, especially for informating regarding particularly hazardous chemicals such as carcinogens, reproductive toxins, highly acute toxins, including postings, decontamination plan, and address above. C. Environmental Hazards/Controls

<u>lote</u> : List additional a	pprovals/permits/reviews required.	
7. Offsite Work Haza		
Hazard	Controls (Administrative, Engineered, Pr Equipment)	otective

Note: List the location of all off-site work and identify any off-site organization whose ESH requirements will be followed (e.g., other DOE Labs). Indicate additional controls (not specified above) that are needed.

FESHM 7050 Form F2 December 2020

G.	Security	Issues/	Controls

Issue	Controls (Administrative, Engineered, Protective Equipment)

Note: Consult the security office at x4507 or x4949 for more information or guidance.

FESHM 7050 Form F2 December 2020

IV. PERFORM WORK WITHIN CONTROLS

All work shall be performed within the controls identified within this document. It is the PI's responsibility to ensure that this document is kept up to date. The PI should consult with the Division ES&H Department as appropriate to determine if changes to this document are significant enough to require a new review/document.

The PI should document any hazard assessments performed for this experiment in Section VI.

A. Training

List all project jobs classifications, and identify any certifications or specific training required. Contact your ES&H Training Coordinator or review the Individual Training Needs Assessment (ITNA) form, as appropriate for assistance.

It is the responsibility of the Principal Investigator to maintain a complete up-to-date list of personnel and their full training requirements, and to ensure that training and qualifications are appropriate for the workers job.

Job Type (e.g., rigger, technician)	Required Training (Course or FN code)

FESHM 7050 Form F2 December 2020

<u>Note</u>: Consult FESHM Chapter 4010 for further information about training program implementation

B. OSHA/DOE Required Medical Surveillance

Indicate if potential exposure is in excess of trigger levels listed. Exposure evaluation and/or medical surveillance may be required. Additional training may be required for any indicated agent. See the SDS or contact the ESH&Q Section for additional information and controls on the hazards listed.

Regulated Hazard	Hazard Specific Training Trigger	Medical Surveillance Exposure Trigger
□ None		
☐ Inorganic Arsenic	Any day above the OSHA action level (without regard to respirator use)	30 days/year above the action level (without regard to respirator use)
☐ Biohazards (CDC/NIH/WHO listed Agent)	None	See Subject Area for guidance
☐ Cadmium	Any day above the OSHA action level	30 or more days/year at or above the action level
□ Lasers	Use Class IIIb or Class IV Lasers	Use Class IIIb or Class IV Lasers
□ Lead	Any day above the OSHA action level	30 or more days/year at or above the action level
☐ Methylene Chloride	Any day above the OSHA action level	 - 30 days/year at or above the action level - 10 days/year above the 8-hour TWA PEL or the STEL - Any time above the 8-hour TWA PEL or STEL for any period of time where an employee at risk from cardiac disease or other serious MC-related health condition and employee requests inclusion in the program
□ Noise	Any day above the ACGIH TLV	Any time equal or greater then 85 dBA TWA 8-hour dose
☐ OSHA Regulated Chemicals Acrylonitrile Benzene Benzidine 1,3 Butadiene 4-Dimethyl aminoazobenzene Ethylene oxide	Any day above the OSHA PEL	 Routinely above the action level (or in the absence of an action level, the PEL) Event such as a spill, leak or explosion results in the likelihood of a hazardous exposure

FESHM 7050 Form F2 December 2020

Regulated Hazard	Hazard Specific Training Trigger	Medical Surveillance Exposure Trigger
Ethyleneimine Formaldehyde Vinyl Chloride		
☐ Static Magnetic Fields	Worker who routinely works in magnetic field	 Any time at ≥ 0.5 mT (5 G) for Medical Electronic Device wearer Any day at ≥ 60 mT (600 G) to whole body [8 hour average] Any day at ≥ 600 mT (6000 G) to limbs [8 hour average] Any Time at ≥ 2 T (20,000 G) to whole body [ceiling] Any time at ≥ 5 T (50,000 G) to limbs [ceiling]

Note: CDC = Centers for Disease Control,

NIH = *National Institutes of Health*,

WHO = World Health Organization,

STEL = Short-Term Exposure Limit

 $ACGIH\ TLV = American\ Congress\ of\ Governmental\ Industrial\ Hygienists\ Threshold\ Limit$

Value

FESHM 7050 Form F2 December 2020

C. Emergency Procedures

Identify any emergency actions, procedures, or equipment that must be in place to insure personnel safety and environmental protection. Include the location of emergency shutoffs, and spill control materials.

D. Transportation

Identify materials, hazards and controls for any on-site and off-site transportation of hazardous and/or radioactive materials.

FESHM 7050 Form F2 December 2020

E. Notifications

The PI or designee should notify building occupants of any activities that might impact them or their work, and document this here. List external personnel/organizations that require notification related to experimental activities and/or to be notified of changes (e.g., Fire/Rescue).

FESHM 7050 Form F2 December 2020

V. PROVIDE FEEDBACK ON ADEQUACY OF CONTROLS AND CONTINUE TO IMPROVE SAFETY MANAGEMENT

Provide comments on the review process, including this form and communication. Identify any lessons learned or worker feedback contributing to modifications/improvements to the controls or process.

FESHM 7050 Form F2 December 2020

VI. ATTACHMENTS

Use this section to include any supporting documents, hazard assessments, engineering notes, tables, etc. that were not entered into the previous sections of the form.
